

INTERNATIONAL MASTER IN TRANSPORTATION AND ENERGY

**Study in synergy
with academic and industrial experts
and become a key player of tomorrow's transport!**

INTERNATIONAL MASTER IN TRANSPORTATION AND ENERGY

Located in Valenciennes, in the North of France, INSA Hauts-de-France offers a unique educational experience to talented women and men interested in the transportation industry (automotive, railway, aeronautics).

OBJECTIVES

International Master in Transportation and Energy is entirely taught in English.

This program offers lectures, practical works and individual or team research and development projects in the fields of automotive, railway and aeronautic engineering and other research topics such as energy management.

This program gives access to a Master degree delivered in co-accreditation by Université Polytechnique Hauts-de-France and Institut National des Sciences Appliquées (INSA) Hauts-de-France, and recognized by the French Ministry of Higher Education and Research.

STRONG LINKS WITH RESEARCH AND INDUSTRY

Work in synergy between teachers-researchers of INSA Hauts-de-France and industrial experts bring high theoretical and practical skills to the students.

Students can take benefit of numerous experimental platforms (test benches, combustion and hybrid engines, metrology, CAD, finite element software...) and other key elements of the INSA Hauts-de-France approach to engineering education, such as high staff/student ratio.

Students work with teachers-researchers belonging to the internationally recognized Research laboratories of Université Polytechnique Hauts-de-France and also directly in cooperation with industrial partners (Alstom, Audi, Capgemini, Hexa Ingénierie, ONERA, Railtech, Renault, Siemens). A semester is dedicated to internship in company to strengthen practical skills of students.

Teaching and Research at INSA Hauts-de-France match the actual need of transportation sector, strongly implanted in Valenciennes area (Alstom, Stellantis, Renault, Transdev...), which leads to a high hiring rate of students just after graduation.

THE KEY FEATURES OF OUR INTERNATIONAL MASTER ARE:

- The relevance of the courses to modern trends in the transportation industry
- The excellence and industrial relevance of the research and development work (group & individual projects)
- The high standards of teaching by professors and experts from industry
- Courses designed to enhance specific subject knowledge and develop transferable skills in transportation technology

CAREER PROSPECTS:

Our graduates will be expert in the most promising new technologies in mechanical engineering and energy. They will be able to:

- prepare for a career as an engineer for industrial projects and services
- acquire a valuable background in all fields of transportation industry.

POSITIONS HELD:

Senior positions in Research and Development,
Engineering Consultancy,
Quality Engineering,
Project Manager, etc...

COURSE SYLLABUS

This program aims at providing in-depth specialization in the wide-ranging field of transportation.

Each semester includes modules dedicated to scientific and technical foundations, followed by modules of specialization in automotive, railway and aeronautics domains.

No French proficiency is needed. Free French courses are provided during all program duration.

1ST YEAR PROGRAM

Semester 1 - 30 ECTS

Tools and Methods 1
Design Process
Safety
Reliability Engineering and System Safety 1
Team Project
French Language Course

Semester 2 - 30 ECTS

International Business Management
Tools and Methods 2
Production and Transportation Logistics
Comfort and Ergonomics
Reliability Engineering and System Safety 2
French Language Course

2ND YEAR PROGRAM

Semester 3 - 30 ECTS

Thermal & Hybrid Engines, Electrical Machines
Internal Combustion Engines
Thermal management of vehicles
Aerodynamics and turbulence
Tools and Methods 3
Team Project
French Language Course

Semester 4 - 30 ECTS

Internship

ADMISSIONS REQUIREMENTS

The course is specially designed for international students.

For the 1st year - Master 1:

Enrolment is open to students with a bachelor degree in engineering: mechanical, automotive, electronics, electricity, material science, mechatronics, physics and applied sciences.

For the 2nd year - Master 2:

Enrolment is open to students with a master degree (1st or 2nd year) in engineering: mechanical, automotive, electronics, electricity, material science, mechatronics,

ENGLISH PROFICIENCY

It is highly recommended to have a minimum level B2 (upper intermediate) according to the common European Framework of Reference for Languages.

DURATION

2 years - Full time

STARTING DATE OF COURSES

1st week of September

TUITION FEES

The cost covers tuition, class material, use of computers and company visits (travel costs included).

- Admission in 1st year:

1st year: 7,770€ (3,770€ to be paid at admission) + CVEC of about 100€

2nd year: 4,743€ + CVEC of about 100€

- Admission directly in 2nd year: 7,770€ (3,770€ to be paid at admission) + CVEC of about 100€

- CVEC : fees for campus and student life (includes health insurance)

APPLICATION PROCEDURE

Application form can be downloaded from the INSA Hauts-de- France website:
